##### Summary

The North San Jose/Alviso water service area in the City of San Jose is supplied primarily by the SFPUC through two turnouts off the Bay Division Pipelines 3 and 4. The SFPUC turnouts are equipped with emergency connections for a portable chlorinator.

The North San Jose/Alviso service area has two storage tanks and four wells capable of meeting average and peak flow demands that supplement the SFPUC supply during high flow periods.

Other communities in the San Jose Municipal Water System are supplied primarily by water purchased from the Santa Clara Valley Water District, with supplemental supplies coming from local groundwater. An intertie with the City of Santa Clara can be activated within 2 hours.
